Group Name

Group 1

Project Title

Data Dashboard

Team Members

Alya, Andita, Cynthia,
Dinda

Group Project Component

Problem Understanding	80/100	Good
Insight Interpretation	85/100	Good
Accuracy & Transformation	100/100	Excellent
Recommendation & Decision Making	80/100	Good
Query Rationale & Documentation	90/100	Excellent
Data Visualization	85/100	Good
Responsiveness & Accuracy	85/100	Good
Overall Group Project Score	87.25/100	Excellent

Instructor Feedback

"Achieving a group project score of 87.25, the team showed excellent teamwork and solid technical execution. The dashboard design and analytical outputs were well-structured and aligned with project objectives, contributing positively to overall project success."

● Action Learning Project

100/100
Attendance

With an attendance score of 100/100, the participant demonstrates exceptional dedication and commitment to being present, absorbing the material, and actively contributing to the program. This perfect attendance serves as a strong foundation for skill development and job readiness.

0/100
Pre-Test

The participant did not complete the Pre-Test. As a result, an initial assessment of the participant's baseline understanding could not be established. This limits the ability to measure learning progress and evaluate the effectiveness of the program based on pre- and post-assessment comparison.

95/100
Post-Test

The participant's Post-Test score falls within the "Excellent" category. This score demonstrates a strong and comprehensive mastery of the material, reflecting a high level of learning achievement. It indicates that the participant has effectively absorbed and applied the knowledge gained throughout the program.

87.25
Project Score

In the Action Learning Project, the participant served as Data Analyst & Dashboard Designer for the "Data Pioneers" team. Achieving a group project score of 87.25, the participant showed excellent teamwork and solid technical execution. The dashboard design and analytical outputs were well-structured and aligned with project objectives, contributing positively to overall project success.

● Action Learning Project

The participant successfully completed the 5-day Job Readiness Bootcamp covering foundational Data Analytics skills. The program focused on practical, hands-on application of data processing and visualization techniques using spreadsheet tools.

Skills Practiced During Program

1. Data cleaning & validation
2. Basic formulas (SUM, AVERAGE, COUNT, VLOOKUP)
3. Pivot tables & data filtering
4. Data visualization (charts & graphs)
5. Dashboard creation & reporting
6. Group presentation & communication

Suggested Entry-Level Roles to Explore

1. Admin Data/Data Entry Specialist
2. Junior Business Admin (with data reporting tasks)
3. Operations Support (data-related)
4. Sales/Marketing Admin (reporting focus)

Note: This assessment reflects observed performance during the 5-day bootcamp program. Further technical assessment by employers is recommended to evaluate job-specific competencies.

● Placement Readiness Status

READY FOR WALK-IN INTERVIEW

The participant has demonstrated technical readiness (based on group project & post test result).
Final profiling for Walk-in Interviews will integrate these technical results with personality and technical assessment data to ensure the candidate meets the standards of the defined industry
